

Bureau of Industry and Security Seminars: “Complying with U.S. Export Controls” and “U.S. Technology Controls”

Presented by:

North Georgia District Export Council, Bureau of Industry and Security (BIS), and Atlanta U.S. Export Assistance Center

Complying with U.S. Export Controls

This two-day seminar provides an in-depth examination of the Export Administration Regulations (EAR), covering the information exporters need to know to comply with U.S. export control requirements on commercial goods. We focus on the goods and activities subject to the EAR, the steps to take to determine export licensing requirements, how to determine your export control classification number (ECCN), when you can export or re-export without applying for a license, export clearance procedures and record keeping requirements, Export Management System (EMS) concepts, how to ensure compliance, and how export controls are enforced. Presenters conduct hands-on exercises to prepare you to apply the regulations to your own company's exports. This program is well suited for those who need a comprehensive understanding of their obligations under the EAR. Seating for this seminar is limited to 165 participants.

U.S. Technology Controls

This full-day seminar offers a comprehensive view on complying with U.S. government export and re-export controls for technology, software, and encryption. The course focuses on the regulatory requirements for technology and software, including what is considered an export or re-export of technology or software; what technology and software is subject to the Export Administration Regulations; what license exceptions are available for technology exports; and the latest developments in encryption controls, including the provision for >64 bit “mass market” encryption, for U.S. origin encryption components incorporated into foreign products, as well as encryption notification and reporting requirements. BIS technical and policy specialists examine critical export control issues that may arise in the employment of foreign nationals and for foreign items incorporating, or produced from, controlled U.S.-origin software and technology. Maximum seating for this seminar is limited to 55 participants, please do register early for these events to ensure your seating.

Registration: 8:00AM

Program: 8:30AM - 4:30PM

Dates: February 28 - March 2, 2006

Location: GTRI Conference Center
